

100 YEARS IN THE MAKING

A CENTURY OF OUR HISTORY

1918

United States Hoffman Machinery Company

Created the Hoffman Air & Filtration Division
Which handled air, water and oil filtration
as well as vacuum and distillation technologies
Located in Syracuse New York

1920

Thomas P. Endicott invented a distillation system
for solvents, petroleum distillates, and water

Later known as the AGC Hydrosolv (AHS)

The patent was assigned to his employer

United States Hoffman Machinery Company

U.S. Patent No. 1,426,053 (Issued 1922, Expired 1937)

1945

Francis J. Armstrong Invented a Disc Filtration System
for the use of filtering lubricating and gear oil

Later known as the AGC Strainer Vessel (ASV)

The patent was assigned to his employer

United States Hoffman Machinery Company

U.S. Patent No. 2,807,451 (Issued 1953, Expired 1970)

1948

Albert S. Allen Invented a Vaporizing Unit & Tray System

Later known as the AGC Oil Conditioner (AOC)

The patent was assigned to his employer

United States Hoffman Machinery Company

U.S. Patent No. 2,807,451 (Issued 1953, Expired 1970)

1958

United States Hoffman Machinery Company

Took the oil filtration and distillation departments
of the Hoffman Air & Filtration Division and did a
Joint-Venture with Albert J. Allen in Springfield, MO

Hoffman-Allen Corporation

1958

Albert S. Allen Invented the Combined Full-Flow
and by-pass filter with strainer for oil filtration

Later known as the AGC Filter Vessel System (AVS)

The patent was assigned to his company

Hoffman-Allen Corporation

U.S. Patent No. 2,966,269 (Issued 1960, Expired 1977)

1963

Albert S. Allen passed and his wife Catherine H. Allen bought out any remaining partner interest and all rights to licenses and patents from all preceding corporations The company becomes a 100% women owned company The company remained in Springfield and was renamed **ALLEN FILTERS, INC.**
